Local Items

T. Abrahamson, of Kimmund
who has been spending the winter
in the States, returned last week
to his farm.

Owing to the increased volume
of business the Service Garage
have been compelled to increase
their staff and have engaged the
services of Mr. H. Hughes, of
Cochrane, Alta., who is an expert
mechanic.

M. L. Chapman has rented the
Aylesworth farm near town.

Mr. Chas. Neff, who has been
spending two weeks at Stettler
and Rocky Mountain House, re-
turned on Saturday.

Leonard Dressell is branching out
right. He has rented the Shab-
ino section of land near town and
will put same into crop this year.

Dr. Esler will occupy suite two
at the Chinook Hotel on his visit-
ing days Tuesday and Friday.
Anyone desiring the Doctor's ser-
vices can leave word at the office
of the Hotel.

Robt Vallance, who has been
working in Drumheller during the
winter, returned on Saturday to
his farm near Rollinson.

Mr. and Mrs. A. Stevenson, of
Heathdale, returned recently from
Vancouver where they have been
spending the winter.

I. W. Deman has made arrange-
ments to farm the Gregg place in
the Laughlin district this year.

N. McPhee, of Davidson, formerly
of this district, was a visitor
in town last week renewing old
acquaintances. Mr. McPhee ex-
pects to return to this district in
the near future.

J. N. Key, auctioneer, will hold
a community auction sale in
Chinook on Saturday, April 11,
at 1.30 p.m. Anyone desiring to
list articles for sale, notify The
Chinook Advance or J. N. Key.

There will be several young
men employed as Student-Pastors
in this district during the coming
summer. Mr. Nelson H. Hall has
been re-appointed to Chinook,
Crystal and Laughlin districts.
The young men will arrive early
in May. Messrs. Hall and Flindall
are students of Victoria Col-
lege, Toronto, and Mr. McNeil is
attending Alberta College, Ed-
monton.

Mr. P. R. Dobson, formerly of
Chinook, has been appointed
manager of the Crown Lumber
Company yard at Rockyford.

Messrs. Robinson Bros. have
installed an Oxy-Acetylene Weld-
ing outfit.

Finley McKenzie, of Marsden,
Sask., is in town this week renew-
ing old acquaintances.

Geo. Clemons, of Heathdale, re-
turned Tuesday from Calgary
where he has been spending the
past two weeks.

Chinook Tennis Club Meeting

The Chinook Tennis club for
1925, was organized last Saturday
evening at a well attended meet-
ing. Officers who will carry on
for this year are: President, Miss
M. Graham; vice-president, Miss
L. Mix and R. Deman; secretary-
treasurer, Miss D. Roberts. Com-
mittee, Misses Lily Howton, D.
Rawlinson, L. Philaja, A. Neff,
and Mrs. R. Smith.

The club expects to enroll a
number of members this year and
the prospects are good for an ex-
cellent season. The court will be
put in shape as soon as it dries
out.

Players wishing to join the club
should hand in their names and
membership fees to the secretary.

Easter Service

The sacred festival of Easter
has been appropriately termed
"the queen of festivals". It has
been observed from the founda-
tion of the Christian era, and is
celebrated in every part of the
Christian world with great solemn-
ity and devotion. An Easter
service will be held in the Chinook
Church next Sunday evening at
7.30. Special Easter music. You
are invited to attend.

New Settlers For Alberta

Under the immigration scheme
of the British and Canadian gov-
ernments, 14 families of new set-
tlers are now in Alberta having
arrived the past week from the
old country. They will be located
in various places in central and
northern Alberta.

For the purpose of colonizing
lands which he owns in the Leth-
bridge Northern irrigation tract,
H. E. Meibach of Lethbridge is
bringing 20 families from Bessar-
abia. The new colony, it is
planned will raise from 300 to
500 acres of sugar beets each year.

Chinook Golf Club

Elect Officers

S. H. Smith, President

A meeting of the members of
the Chinook Golf Club was held
on Monday evening to elect the
officers, S. H. Smith heading the
slate as president.

The other officers and com-
mittees are: Vice-president, E.
E. Jacques; secretary-treasurer,
W. E. Cottom; Greens committee
W. A. Hurley, C. W. Rideout, M.
L. Chapman; Fairway committee
S. H. Smith, D. McKenzie, J. T.
Kerr; Draw committee, L. S.
Dawson, E. Jacques.

In order that everybody may
participate in this national game
the club has lowered the member-
ship fees to be within the reach
of all. The fees this year are
gentlemen \$5 and ladies \$2.

Mrs. E. G. Parsons, who was a
visitor in Calgary last week, re-
turned Monday accompanied by
her little daughter Margaret who
will spend Easter here.

"Made in Canada under Government supervision."

A Real National Policy

The welcome announcement comes from Ottawa that at long last a real effort is to be made by the Federal Government and the Canadian National Railway in an endeavor to overcome the geographical obstacles which separate Western Canada from the central provinces, and the central provinces from the Maritimes, and in so doing assist to make Canada independent of the United States in so far as one article at least is concerned, namely, coal.

Ever since Confederation became an accomplished fact it has been the aim of all Governments to develop the Dominion along east and west lines and thus make it, as far as possible, a self-contained, self-supporting national unit. Hundreds of millions of dollars have been expended in the effort in the construction of transcontinental railways, building of canals, development of harbors on the Atlantic and Pacific coasts, and in the maintenance of a so-called national fiscal policy.

Nevertheless, rich as the Dominion unquestionably is in natural resources of all kinds, and in particular, with billions of tons of coal, the central provinces of Canada have remained dependent on the United States and gone on importing fuel supplies to the extent of approximately one hundred millions of dollars annually, with the result that the importation of coal has constituted the chief item in our adverse balance of trade with the United States.

The difficulty has been, of course, that Canada's coal deposits are to be found in the extreme eastern and the extreme western provinces while the bulk of Canada's consuming population and manufacturing industries are to be found in the central provinces, and the cost of transportation of coal has been too great to enable it to be laid down in Ontario and Quebec in competition with United States coal.

Thus Canadian dollars have paid the wages of thousands of miners in the United States, have provided tonnage and revenues to United States railways, and paid dividends to United States mine owners, while the Canadian miners and railways have lacked employment and our natural resources, which should have been adding to the wealth of Canada, have remained undeveloped, and the people and industries of the central provinces have lived in the precarious position of possibly having their fuel supplies shut off at any time that labor conditions forced a fuel shortage across the line.

In an effort to correct this situation the Government has announced a two-fold plan. First, arrangements have been made with the Canadian National Railway to transport 100,000 tons of Alberta coal during the spring and early summer months to Ontario at the low rate of \$7.00 per ton, or only a little more than one-half the present rate. This movement will take place at the season when railway traffic is at low ebb. The experiment in haulage of these solid trains of coal will be closely watched, and from the experience gained it is hoped that, while no great profit is expected to result to the Canadian National Railway directly, there will not be any great operating loss, and that employment will be provided during an otherwise slack period.

To meet the Maritime problem the Government proposes to pay a bonus or royalty to concerns which will develop plants for the turning of Nova Scotia coal into coke to be sold in the central provinces in competition with United States anthracite. This Nova Scotia coal can be brought by water transportation to Montreal—the cheapest form of transportation—and, in addition to coke, several other by-products of commercial value can be obtained.

The success of this two-fold experiment in providing Canadian coal for Ontario and Quebec, and thereby keeping Canadian money at home, providing employment in the extreme east and west, and keeping our own transportation companies busy, rests very largely, if indeed not wholly, with the people and manufacturers of the two central provinces. They are strong advocates of national policies in the matter of tariffs, exports duties on raw materials, etc. It now remains to be seen whether they will prove equally strong supporters of a national coal policy, or whether they will continue doing as they have done in the past, following the line of least resistance, the easiest way, and go on buying United States coal which is, comparatively speaking, at their doors, to which they have so long been accustomed to using, and for the use of which their plants have been designed.

For the sake of Canada it is to be hoped the central provinces will take a big national view of this matter and join forces with the Government, the National Railways and the coal dealers in making this experiment a success. To be successful it must be persisted in, but if persisted in, Canada can undoubtedly become independent so far as its fuel supply is concerned.

Has Few Traffic Cases

Jerusalem Has No Motoring Facilities and Fines are Low

Well, anyway, there are some attractions about life in modern Jerusalem. There are few motor accidents and no traffic courts. Frederick Partridge, of the Jerusalem police department, visiting the New York traffic court, was amazed when he was told that the court handled 40,000 cases and collected \$500,000 in fines last year. Jerusalem, he said, had no motoring fatalities, and the traffic cases are so few that they are tried in the regular municipal court. The fines, too, should be an attraction. Jerusalem's fines run from 50 cents up.

The hide of a cow produces about thirty-five pounds of leather; that of a horse about eighteen pounds.

Today China probably has the largest number of soldiers of any nation.

No Fractional Postage Stamps for Canada

United States Issuing Series to Cover New Rate

While Uncle Sam is issuing stamps calling for fractional postage of 1½ and 1¼ cents respectively, there is no intention of issuing such stamps in Canada, according to Postmaster J. L. McLean, of Toronto. "The United States has recently changed the rate of postage on all third-class matter to 1½ cents for each two ounces or fraction of two ounces, and this is the reason for the 1½ cent stamp. Here the comparative postage is one cent, covered by the present cent stamp." Canada used to circulate a half-cent stamp, but it is now in demand only among collectors. "The nearest Canada comes to the fractional stamp at present," said Mr. McLean, "is the 1½ cent business reply postage, but there is no stamp issued of 1½ cent denomination."

Cattle Carried by Government Ships Between May, 1922, and Jan. 21, 1925, ships of the Canadian Government Merchant Marine carried 9,948 head of cattle from Canada to United Kingdom ports, a return tabled in the house shows.

The Entente Cordiale

Says Relations Between Britain and France Were Never Better

"Relations between France and England were never more cordial than they are today," said Hon. W. C. Nichol, lieutenant-governor of British Columbia, on his return to Canada recently from a visit to the former country.

"When I left," he said, "an earnest endeavor was being made on both sides to bring about a situation that would remove the shadow of war from Europe and promote general trade and export."

Referring to his own province, the lieutenant-governor said that there was every indication of British Columbia being swamped with tourists this year from the old countries as well as from the United States, and he expected much settlement and land development there this year, partly as a result of the tourist traffic of former years.

BEAUTIFY IT WITH

"DIAMOND DYES"

Perfect home dyeing and tinting is guaranteed with Diamond Dyes. Just dip in cold water to tint soft, delicate shades, or boil to dye rich, permanent colors. Each 15-cent package contains directions so simple any woman can follow.

or tint finger tips, silks, ribbons, stockings, waists, dresses, coats, sweaters, sweaters, draperies, coverings, hangings, everything new.

Buy "Diamond Dyes"—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

Canada At Wembley

C.P.R. Pavilion at British Empire Exhibition to be Renovated

Work is already in progress on the complete renovation of the Canadian Pacific Railway Pavilion at the British Empire Exhibition. Exhibits will be re-arranged and many new features added, and the million or so people who saw this exhibit last year will again have an opportunity of seeing new phases of Canada's agricultural, industrial and social life. During the 1924 exhibition over a million pieces of literature were issued and it is hoped that this year—providing the weather is better than last year—that the attendance at the Canadian Pacific Pavilion will be at least double the number that attended in 1924.

Makes Breathing Easy. The constriction of the air passages and the struggle for breath, too familiar evidence of asthmatic trouble, cannot be cured by Dr. J. D. Kellogg's Asthma Remedy. This is the famous remedy which is known far and wide for its complete effectiveness even under very severe conditions. It is no untried, experimental preparation, but one with many years of strong service behind it. But it from your nearest dealer.

Would Ban U.S. Fishermen

A resolution was passed at a meeting in Prince Rupert, B.C., of the Retail Merchants' Association and the Fish Boat Owners' Association, asking the Dominion Government to close all British Columbia ports to United States fishing vessels whose owners or captains do not maintain a residence in British Columbia, or do not buy their supplies at these ports when selling their fish there.

The worms that infest children from their birth are of two kinds, those that find lodgement in the stomach and those that are found in the intestines. The latter are the most destructive, as they cling to the walls of the intestines and if not interfered with work havoc there. Miller's Worm Powders dislodge both kinds and while expelling them from the system serve to repair the damage they have caused.

Sirens For Submarines
Electric sirens for submarines have been invented by a Swedish engineer to prevent collisions of the boats and to warn other vessels to clear out of the way when the subs are about to return to the surface of the water.

CHAPPED HANDS

Minard's cases them, soothes and heals. It protects them from biting winds. Mix Minard's with sweet oil and use as shaving lotion. Makes your face feel fine.

World's Largest Negro Colony

District in New York Is "A City Within A City"

In one square mile of the Harlem District of New York is housed the largest gathering of Negroes in the history of the world, according to the Survey Graphic, a magazine owned and edited by Negroes, the first number of which has just been issued. Its announced purpose is to interpret Harlem as the plurality of the Negro World.

James Weldon Johnson, who has attained prominence by his work in the promotion of Negro welfare, says: "Harlem now stands for the Negro Metropolis. It is not merely a Negro colony of community. It is a city within a city, with new apartments and handsome dwellings, well paved and well lighted streets. It has its own churches, social and civic centres, shops and theatres. "Within this belt of seventy or eighty blocks can be found colored people of British, French, Dutch, Spanish, Arabian, Danish, Portuguese and native ancestry."

Takes Strange Oath

French Communist Deputy Takes Oath On Sickle and Hammer

"I will only consent to be sworn on the symbols of my religion," declared Ruffin Dugens, former Communist deputy, when he appeared before the parliamentary committee at the French capital, which is investigating election campaign funds.

Chairman Mialard said he was afraid he could not oblige the witness with the necessary symbols, but M. Dugens said he was prepared for that.

From a portfolio he drew forth a hammer and a sickle, the point of the blade guarded by a cork, crossed them on the table, raised his hand, and declared in a loud voice:

"I swear on this emblem of the Union of the Workers of the City and of the Fields, to tell the truth, the whole truth, and nothing but the truth."

The members of the committee held their sides in laughter.

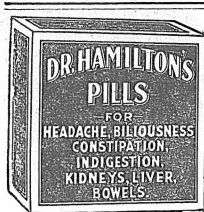

To have the children sound and healthy is the first care of a mother. They cannot be healthy if troubled with worms. Use Mother Graves Worm Exterminator.

ECLIPSE FASHIONS
Exclusive Patterns
By Hazelbyne

Boys' Suit, Showing an Attractive Combination of Materials

Careful thought must be given to outfitting the sturdy small boy, who requires garments suitable for general utility wear. The suit No. 1021 consists of blouse with long or short sleeves, and straight side-closing trousers which button to the blouse. It may be made of all one material, or of a combination of contrasting materials as shown in the sketch. The pattern is cut for sizes 4, 4½, 5, 5½, 6, 6½, 7, 7½, 8, 8½, 9, 9½, 10, 10½, 11, 11½, 12, 12½, 13, 13½, 14, 14½, 15, 15½, 16, 16½, 17, 17½, 18, 18½, 19, 19½, 20, 20½, 21, 21½, 22, 22½, 23, 23½, 24, 24½, 25, 25½, 26, 26½, 27, 27½, 28, 28½, 29, 29½, 30, 30½, 31, 31½, 32, 32½, 33, 33½, 34, 34½, 35, 35½, 36, 36½, 37, 37½, 38, 38½, 39, 39½, 40, 40½, 41, 41½, 42, 42½, 43, 43½, 44, 44½, 45, 45½, 46, 46½, 47, 47½, 48, 48½, 49, 49½, 50, 50½, 51, 51½, 52, 52½, 53, 53½, 54, 54½, 55, 55½, 56, 56½, 57, 57½, 58, 58½, 59, 59½, 60, 60½, 61, 61½, 62, 62½, 63, 63½, 64, 64½, 65, 65½, 66, 66½, 67, 67½, 68, A Romance of the Spanish Main CAPTAIN BLOOD RAFAEL SABATINI

Copyrighted, 1922, by Rafael Sabatini
"CAPTAIN BLOOD," a Vitaphone picture with J. Warren Kerrigan
in the title role, is an adaptation of this thrilling novel.

SYNOPSIS

Captain Peter Blood is the terror of the Spaniards who call him Spanish Main. He loves Arabella Blunstone, niece of the governor of Barbados, who is about the Royal Mary which bears Lord Julian Wade to the West Indies to make peace with piracy. Lord Wade tells Arabella of Blood's reputation and that he is about to wed Madelon d'Ogeron, daughter of the Dutch governor of Tortuga. The Spanish ship, Milagro, sinks the Royal Mary and Arabella and Wade are taken prisoners.

CHAPTER XVI.—Continued

Miss Bishop, newly risen, had come out to take the air on the quarterdeck, with his lordship in attendance, when he beheld the big red ship that had once been the *Cinco Ligas* out of Cadiz. The slight thrill he felt, curiously, it awoke in her an uplifting sense of pride that took no account of danger to herself in the encounter that must now be inevitable.

Beside her on the poop stood Lord Julian. But he shared none of her exultation. He had been in his first sea fight yesterday, and he felt that the experience would suffice him for a very considerable time.

"Look," said Miss Bishop, pointing. Did she realize, he wondered, what was about. Her nostrils were flared, his doubt. "She is English, and she comes resolutely on. (She means to fight.)"

"God help her, then," said his lordship gloomily. "Her captain must be mad. If they could so easily blow the Royal Mary out of the water, what will they do to this vessel? Look at that devil Don Miguel. He's utterly disgusting in his glare."

Of necessity now, under diminished sail, the advance of the Arabella was slower; but it was none the less steady. She was already within shaker shot, and they could make out the figures stirring on her forecastle and the brass guns gleaming on her prow. The gunners of the Milagro raised their muskets and blew upon their smoldering matches, looking up impatiently at the admiral. But he admiral solemnly shook his head.

"Stab me!" said his lordship. "This Englishman may be gallant enough to accept battle against such odds. But there are times when discretion is a better quality than gallantry in a commander. Presently you will suffer me to place you under cover."

"I can see best from here," she answered him. And added, quietly: "I am praying for this Englishman. He must be very brave."

The Arabella was advancing, now, along a course which, if continued,

BETTER IN EVERY WAY

After Taking Lydia E. Pinkham's Vegetable Compound

Ingomar, N. S.—"I took your medicine for a run-down condition and inward troubles. I had pains in my right side so bad at times that I could not walk any distance. I saw about Lydia E. Pinkham's Vegetable Compound in the newspapers and have taken five bottles of it. I am better in every way and you can see, my ALMA M. PERRY, Ingomar, N. S."

Nervous Breakdown Relieved

Toronto, Ontario.—"It is pretty hard to explain your feelings, in nervous troubles. I felt low spirited, had pains in my head and eyes, always crying, and did not want to go anywhere. I do knitting and fancy work, and I would get irritable after a few minutes of work. I have been in Canada five years and have been this way ever since I came. I am taking Lydia E. Pinkham's Vegetable Compound and I sleep better and it seems to make me eat, and I must say I am feeling more jolly. I have great faith in your medicine because of what it has done for my husband's sister and she recommended it to me."—Mrs. A. SMITH, 10 Barbich Avenue, Toronto, Ontario.

All druggists sell this dependable medicine, and women suffering from these troubles so common to their sex should give it a trial now.

W. N. U. 1573

Attempt Ascent of Mount Logan

Canadian Expedition to Climb Lottiest Peak in Canadian Territory
A Canadian expedition which will attempt the ascent of Mount Logan (19,850 feet) in the Yukon, and the loftiest peak in Canadian territory, is to leave Vancouver soon. It will be headed by A. H. McCarthy and Col. W. V. Foster, of Vancouver, and six other gentlemen, including a representative of the English Alpine Club, will complete the party.

must carry her straight between the two Spanish ships.

But even at that moment the admiral raised his hand; in the waist below him, a trumpet blared, and immediately the gunner on the forward gun of his guns. As the thunder of them rolled out, his lordship saw, ahead, beyond the English ship, and to leeward of her, two heavy splashes. Almost at once two successive spurts of flame leapt from the brass cannon on the Arabella's bowhead, and scarcely had the watchers on the poop seen the shower of spray where one of the shots struck the water near them than, with a rending crash and a shiver that shook the Milagro from stem to stern, the other came to lodge in her forecastle. To avenge that blow, the Hidalgo blazed at the Englishman with both her forward guns. But, even at that short range (between two and three hundred yards) neither shot took effect.

"I do not number thieves and pirates among my acquaintances."

At a hundred yards the Arabella's forward guns, which had meanwhile been reloaded, fired again at the Milagro, and this time smashed her bowsprit into splinters, so that for a moment she yawled helplessly to port. Don Miguel swore profanely, and then, as the helm was put over to swing her back to her course, his own prow replied. But the aim was too high, and whilst one of the shots tore through the Arabella's shrouds and scarred her mainmast, the other again went wide. And when the smoke of the discharge had lifted the English ship was found almost beneath the Spaniards, her bows in line with theirs and coming steadily on. At last the Arabella was right between the Spanish ships, prow to poop and poop to prow. Don Miguel pointed to the trumpet, who had mounted the quarterdeck and stood now at the admiral's elbow. The man raised the silver bugle that was to give the signal for the broadsides of both ships. But even as he placed it to his lips, the admiral seized his arm to arrest him. Only then had he perceived what was so obvious or should have been to an experienced sea fighter; he had delayed too long and Captain Blood had outmanoeuvred him. In attempting to fire now upon the Englishman, the Milagro and her consort would also be fired into each other. Too late he ordered his helmsman to put the tiller hard over and swing the ship to leeward, as a preliminary to manoeuvring for a less impossible position of attack. At that very moment the Arabella seemed to explode as she swept by. Blistering runs from each of her banks emptied themselves at that point-blank range into the hulls of the two Spanish vessels.

The Milagro staggered slowly ahead. Don Miguel was howling and roaring wildly, and peering over and anon through the curtain of smoke. Blistering runs from each of her banks emptied themselves at that point-blank range into the hulls of the two Spanish vessels.

The Milagro staggered slowly ahead. Don Miguel was howling and roaring wildly, and peering over and anon through the curtain of smoke. Blistering runs from each of her banks emptied themselves at that point-blank range into the hulls of the two Spanish vessels.

Suddenly, and ghostly at first, through that lifting haze, loomed the outline of a ship; gradually the lines of her red hull became more and more sharply defined as she swept

nearer with poles all bare save for the spread of canvas on her spout.

Instead of holding to her course as Don Miguel had fully expected, she would, the Arabella had gone about under cover of the smoke, and sailing now in the same direction as the Milagro, was converging sharply under her across the wind, so sharply that almost before the frenzied Don Miguel had realized the situation, his vessel staggered under the reeling hurricane with which the other came hurtling alongside. There was a rattle and clank of metal as a dozen grapples fell, and tere and caught in the timbers of the Milagro, and the Spaniard was firmly gripped in the tangles of the English ship.

Beyond her and now well astern the veil of smoke was rent at last and the Hidalgo was revealed in desperate case. She was blighting fast. The attention of her hands was being entirely given to a desperate endeavor to launch the boats in time.

Of this Don Miguel's anguished eyes had no more than a fleeting but comprehensive glimpse before his own decks were invaded by a wild, yelling swarm of boarders from the grappling ship. For a moment there was a valiant effort by some of Don Miguel's officers to rally the men for a stand against these invaders. But the Spaniards' hastily formed ranks were smashed before they could be steadied; driven across the waist to the break of the poop on the one side, and up to the forecastle bulkheads on the other, the fighting resolved itself into a series of skirmishes between groups. Soon, however, the rage of that brief fight was spent. The banner of Castle came fluttering down from the mainmast. A buccanier had slashed the halcyon with his cutlass. The boarders were in possession. Suddenly Miss Bishop recovered from her puerile, to lean forward staring wild-eyed, whilst, if possible, her cheeks turned yet a deadlier hue than they had been already.

Picking his way daintily through that shambles in the waist came a tall man with a deeply tanned face that was shaded by a Spanish headpiece. Up the broad companion to the quarter-deck he came, moving with easy assurance, until he stood before the Spanish Admiral. A crisp, metallic voice, speaking perfect Spanish, reached those two spectators on the poop and increased the admiring wonder in which Lord Julian had observed the man's approach.

"We meet again at last, Don Miguel," it said. "I hope you are satisfied. Although the meeting may not be exactly as you pictured it, at least it has been very ardently sought and desired by you."

(To be continued)

May Be Breaking Law

Members of British Parliament Faced By Queer Situation

Members of the British Parliament who have telephones in their homes were somewhat startled recently when they ascertained that, because of the instruments, they might be deprived of their seats in the house. They are asking whether they have committed a breach of the famous act of George the Third parliament, which says that any person undertaking a contract with a government department shall not be entitled to sit in the house. The telephones there are owned and operated by the government.

The question was brought to light by Captain T. J. O'Connor, himself a member of parliament and having a telephone in his office, who announced that he would ask the attorney-general if he proposed to introduce legislation to safeguard members who have contracts with the postmaster-general for the installation of telephone services.

Zoo Specimen For Canada

Five hundred parrots and love birds, several monkeys, a deer and a Mexican tiger cat, some of which are destined for various cities in Canada as well as the United States, having been collected by passengers, arrived Nov. 20 recently on the Canadian Pacific steamship *Norontay* which completed her second and final West India cruise of the season upon arrival.

The Female of the Species

When a wild and pop-eyed driver shoots his auto down the street, He makes the public stop about on light and nimble feet; He can make the bravest tremble, he can make the boldest quail, But they say the female driver is more deadly than the male.

"Her Majesty the Kaiserin"

Most of the time since she married the exiled kaiser, the former Princess Hermine is signing her letters "Her Majesty the Kaiserin." The signature was first noticed on a letter of condolence in connection with the mine disaster at Dortmund, which took a toll of 137 lives.

Don't worry over anything you can't help—you can't help it. Don't worry over anything you can help—help it.

Hello Daddy—don't forget my Wrigley's

Slip a package in your pocket when you go home to night.
Give the youngsters the wholesome, lasting sweet for pleasure and benefit.
Use it yourself after smoking or when work drags. It's a great little fresher.

Still Another Advantage For Smokers

The Vacuum (Air-Tight) Tin—Suitors of My Lady Nicotine Will Benefit By Recent Innovation

Nothing so often repents the pleasure—the solace—the comfort and enjoyment afforded by Tobacco. But the charm of the leaf is largely the charm of its full rich flavor, and until recently, the perfection of this feature was often marred by the heat of stores and warehouses, especially during Winter, and the dryness of the atmosphere during Summer, which dried Tobacco out, and destroyed its original freshness and fragrance.

The chance of this taking place is now entirely eliminated by the famous vacuum (air-tight) tin. Whether a man smokes cut tobacco, or prefers to cut it himself as he requires it, or whether he chews tobacco, he can now be assured of securing his favorite brands in the same perfect condition as they left the factory. The richness of flavor, the delicate fragrance, the moisture, are all retained by this wonderful innovation, the famous vacuum (air-tight) tin, which is sure to bring increased enjoyment to all who smoke and all who chew.

The story of how the famous Sir Walter Raleigh first introduced Tobacco to civilization is common knowledge. But the leaf which he and his contemporaries indulged in was crude smoking to the brands, enjoyed by smokers to-day. The history of the development of tobacco is a record of a long series of innovations, modifications and devices, all planned to make its use more enjoyable to the consumer. But probably none of these has been so great an improvement from the devotee's point of view, as the famous Vacuum (air-tight) tin, in which the Imperial Tobacco Company of Canada Limited is now packing several of their leading brands of cut smoking, plug smoking, and plug chewing tobaccos.

The Age of Dietetics

The Science of Food is Now Receiving Greater Attention

The recent knighting of Sir Gowland Hopkins, who announced his discovery of vitamins in 1913, prompts "Lens," the medical correspondent of The New Statesman, London, to make the assertion that the master work of this century in medical science is not heredity, nor infection, but nutrition. Barely a dozen persons at the international medical congress in London, although thousands of doctors were present, took the trouble to hear Dr. Hopkins' epoch-making address. A decade or less ago vitamins were regarded as just a passing fashion, just as a quarter of a century ago there were those who said radium was a nine days' wonder. But the science of food has now reached a standard which offers unlimited possibilities.—Toronto Globe.

Value of Grain Inquiry

The total cost of the Turgeon commission will be \$189,707. That works out at about one-fiftieth of a cent a bushel on a single \$50,000,000-bushel crop. As the benefits of the commission's findings and recommendations will endure for at least a decade, it is evident that the country will get its money's worth.—Regina Leader.

Average Owner's Idea Of Judging Dogs

Is Quite Different From Method Employed By Experts

The results of the dog show indicate a lamentable divergence between the experts' idea of a good dog and the average owner's idea. At the dog show the judges take into consideration such things as head, neck, eyes, shoulders, fore legs, hindquarters, tail, frame, weight, color, gait, etc. Are these what the owner cares about? They are not. The main points about a dog in the average American home are as follows:

The way he waggles his tail when offered a lump of candy.

The cute way he holds his paw over his nose when asleep.

His manner of begging for food from the table.

The way he comes from behind and licks your hand.

His intelligence, as indicated (a) by offering his right fore paw to strangers; (b) by pretending to be asleep on command; (c) by bringing father his slippers.

His funny, little, cold nose.—New York World.

Bellringers Perform Unprecedented Feat

Rang Peal of 5,280 Changes in Short Time at St. Paul's

An unprecedented feat of change ringing has been performed on the 12 bells of St. Paul's Cathedral.

At the fourth attempt in four consecutive years a band of the Ancient Society of College Youths (the old ringing guild) rang a complete peal in the method known as Cambridge Surprise Maximus, of 5,280 changes in 4 hours and 11 minutes.

Only 3 peals have ever been rung at St. Paul's, and they were of a simpler order than the last one, which is the most difficult that can be practised on 12 bells. The bells range from 8 cwt. treble to the 3 ton 2 cwt. tenor.

Alfred B. Peck, who rang the tenor, had to pull over his 52 cwt. of metal 5,280 times.

No one man had ever "turned in" a peal of such a weight.

Surpasses Sun In Heat

Star Nearly Three Times As Hot Discovered By Scientist

Estimating the diameters of ten of the brighter stars by separating their heat into a long spectrum and measuring the heat of the different colors, and then calculating the probable temperatures of each of these heavenly bodies, was the work of Dr. C. G. Abbot, director of the Astrophysical Observatory of the Smithsonian Institution, Washington, during a recent series of field experiments, whose results have just been made public.

A star, having nearly three times the heat of the sun, was among those observed by Dr. Abbot. This was Beta Regis, having an estimated absolute temperature of 16,000 degrees centigrade, compared with the sun's 6,000 degrees centigrade.

Tax For Gamblers

Suits have been started in the English courts to compel professional coin-matchers and racehorse betters to pay income taxes.

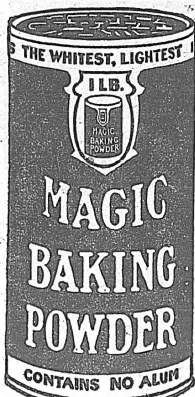

Children Cry for

Fletcher's CASTORIA

MOTHER—Fletcher's

Castoria is a pleasant, harmless Substitute for Castor Oil, Purgative, Teething Drops and Soothing Syrup, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of *Dr. J. C. Fletcher* Proven directions on each package. Physicians everywhere recommend it.

MAGIC BAKING POWDER
CONTAINS NO ALUM

Will Search For Silver

Five Business Men of Hull, England, Going to Alaska

Five business men of Hull, Yorkshire, started out on an adventure which will take them to Alaska in search of silver, when they sailed on the steamship, *Monticarlo*, for Canada. The party is led by John Riley, a well-known commercial agent of Hull, who claims that he discovered hidden treasure during the Klondike rush of twenty years ago, when prospecting off the Beaten Track. Riley declared before sailing that he can find the silver seam blindfolded.

A HAPPY CHILDHOOD IS A MATTER OF HEALTH

Little children quickly get out of sorts, but by prompt treatment they can just as quickly be set right again. Most of their troubles arise in the first place from the stomach and bowels; that is why a good clearing out is the first thing the doctor prescribes. Mothers, why not let Baby's Own Tablets keep your children well. Unlike that ill-smelling, rank-tasting, castor oil, so dreaded by most children, the Tablets are pleasant to take and their action, though thorough, is gentle and causes no discomfort to either the baby or the growing child. Baby's Own Tablets are a never failing remedy for relieving constipation and indigestion; thus they break up colds and simple fevers, expel worms and make the teething period painless. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

BRIER

Macdonald's MONTREAL

1/2 lb. 80¢ also in packages 15¢ & 20¢

TO ELIMINATE ALL SECTIONALISM EAST AND WEST

Montreal.—The council of the Montreal board of trade entertained and discussed with representatives from the Toronto and Vancouver boards, the proposed subsidy to Sir William Peterson and the effect of the Dominion Government to control ocean freight rates. All three boards are opposed to this project. Additional to this matter, some considerable attention was given to the development of business between the Atlantic and Pacific coasts of Canada by the Canadian Government. Merchant Marine by way of the Panama Canal, while western producers were taking advantage of this route, it was shown that reciprocal advantage was not being taken by the easterners.

A lengthy discussion centred on the Toronto board's proposal for assembling representatives of the industrial, commercial and agricultural interests of Canada, with a view to arriving at a broad national economic policy, which all parts of the country might be able to support, in order to eliminate the sectionalism from which the country is now suffering. Some progress was made in working out the plan, which probably will include a gathering at some central point of representatives from all parts of Canada and, if possible, a visit of westerners to Eastern Canada.

Representing the Vancouver board were A. Melville Dollar and W. E. Payne.

No Beer At Picnics

Will Be Strictly Dry Functions In Alberta

Edmonton.—The issuing of special beer licenses for picnic parties will not be permitted in the future, according to an amendment to the Liquor Act passed in the legislature. The amendment was introduced by Mrs. Nellie McClung, Liberal member for Edmonton.

After July 1 of this year, club licenses will only be issued one year after the application has been made, with complete description of the premises, which must be satisfactory to the liquor control board. The object of the amendment is to allow the board sufficient time to determine whether clubs making application are bona-fide or merely attempting to obtain a license for the purpose of making money.

Fraud Brings Prison Term

Armenian Sentenced to 18 Months For Breaking Immigration Law

Ottawa.—George H. Alexander, Armenian, of Galt, Ontario, was sentenced by Mr. Justice Rose in the Assize Court, to 18 months in the Gaol for Forgery for having conspired with Mithran Mithran, of Niagara Falls, N.Y., to fraudulently obtain a naturalization certificate.

The charge against Alexander arose out of the alleged discovery by Royal Canadian Mounted Police of a conspiracy whereby old naturalization papers were used to secure the admittance of Armenian immigrants contrary to the Immigration Act.

Sale Of Canadian Vessels

222 Canadian Vessels Are Sold Since Armistice

Ottawa.—When L. H. Martell, member of parliament for Hanis, asked for a return showing how many boats of any description had been sold by the government since the armistice, with full particulars of the money involved, he started a list which reached the house in a bulky file, showing that 222 craft were sold. These comprised everything from an obsolete cruiser to a canoe. Some fetched tens of thousands of dollars, others as low as \$1.25.

Wheat Pool Officials Meet

No Cause For Alarm Over the Wheat Market

Winnipeg.—Following the monthly meeting of the board of the Canadian Co-operative Wheat Producers, Limited, here, a statement was issued which said: "The directors decided on no change in their present policy and while deploring the condition of chaos in the market at this time, see no cause for anxiety on the part of their members, in view of the strong position of the pool."

Return to Holland

Berlin.—Princess Hermine, wife of the former Kaiser, has returned to Doorn, having recovered completely from a recent operation.

W. N. U. 1571

Ask Advisory Council On Unemployment

Ottawa.—A resolution, petitioning the Federal Government to form an advisory council on unemployment to hold conferences on industrial research before the fall unemployment, was passed at the closing meeting of the two days' session of the national council of women executive here, this advisory council to consist of university economists and labor experts from the various provincial governments and the national council of women.

Says World's Wheat Supply Not Excessive

Will Be Needed Before Next Harvest Opinion of Marketing Expert

Winnipeg.—The Manitoba Free Press publishes the following from a staff correspondent at New York:

The whole world price level has been shocked by successive and apparently unwarranted declines in the wheat market until, now, buying conditions are lacking. But a long range view of conditions now indicates adjustment of supplies, stated Julius H. Barnes, internationally known marketing expert, discussing world wheat conditions. After discussing the situation in the various wheat growing countries, Mr. Barnes forecast increased reliance on North America for wheat supplies, and expressed himself as a firm believer in the relatively small supply of wheat in the world and the fact that it will be all needed before another crop can be harvested.

Reject Amendment To Medical Act

Alberta Legislature Opposes Proposal of Mrs. Nellie McClung

Edmonton.—Provision for legalizing Christian Science practitioners in Alberta, introduced into the legislature, met with strong opposition, and as a result, the proposal, which was moved by Mrs. Nellie McClung, Liberal member for Edmonton, as an amendment to the Medical Profession Act, was withdrawn, and another amendment will be introduced on the same question at a later date.

The amendment reads as follows: "That nothing in this act contained shall apply to, or affect, those who practice the religious tenets of their church without pretending a knowledge of medicine or surgery, and provided that the laws, rules and regulations to contagious diseases and sanitary matters are not violated."

Dominion Pays Large Sum For Subsidies

Foreign Service Received Bulk Of Expenditure For Mail and Steamships

Ottawa.—The Dominion of Canada has expended the sum of \$46,756,599 on mail subsidies and steamship subsidies from 1867-68 up to the present time. This information was given in the house in answer to questions by N. H. McTaggart, Progressive, Maple Creek.

In answering the question, Hon. A. B. Copp, secretary of state, informed Mr. McTaggart that of the total amount, \$33,063,712 had been paid to foreign services, and \$6,857,653 to local services.

Record Raid By Mounties

Find Counterfeit Money and Press in Quebec Farm House

Montreal.—One of the biggest raids ever undertaken against counterfeiters in Canada was staged by the Royal Canadian Mounted Police at a farm house some three miles beyond L'Assomption, in Girard Parish, here, when they seized \$150,000 worth of counterfeit \$10 bills, at least 500,000 cut papers of the same size, ready to be printed, a foot and power driven press of the most up-to-date design and other paraphernalia, and arrested seven men.

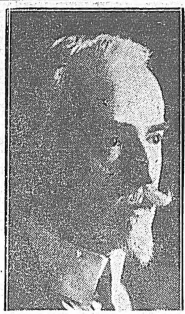

Moisture Greater This Year

Calgary.—During March 14.5 inches of snow fell in Calgary, making the total for the winter 68 inches, or, in terms of actual moisture precipitation, 6.8 inches. The precipitation last winter, covering the period from October 1 until March 31, amounted to 5.86 inches of moisture, or 58.6 inches of snow.

Zionist Ship Arrives

Jerusalem.—The President Arthur, the first ship to fly the Zionist flag, arrived at Haifa, from New York. The 500 American Jews who made the voyage attended the opening of the Hebrew University here, at which Lord Balfour conducted the inaugural services.

Causes Unrest In Japan

WICKHAM STEED

former Editor of the London Times, who has created anxiety among Japanese by speech on Yellow Peril.

GOVERNMENT TO PROCEED WITH NEW GRAIN ACT

Ottawa.—Many representations coming to the government from the west have suggested the decision to go on with the Grain Act after all.

The government, from the start, favored that course, but a group of members, mainly from Saskatchewan, were persistently asking that it should be deferred until another year, having regard to the importance of the measure. No sooner was it announced that the act would be laid over than the same members demanded that it be proceeded with. However, it is not their fluctuating counsel that has counted so much as representations from many agricultural bodies, as well as the grain trade, urging that the present law, now obsolete, should be replaced by one up to date, and particularly, that the reforms suggested in the Turgeon report should be embodied in the act. This is being done on all the essential lines, including the grading, weighing and mixing of grain, and the operation of private elevators.

The bill will be brought down as soon as the budget is over, and referred to the agricultural committee, with the idea that it be put through before the session ends. If, however, the committee, after fully considering it and giving public hearings, should recommend delay, its report would carry great weight.

Will Not Discard Army Death Penalty

Not Punishment But a Deterrent to Others Says War Secretary

London.—The British Labor party fought unsuccessfully in the House of Commons to abolish the death penalty in the British army, an amendment introduced by E. Thurtle, Labor member, Shrewsbury, to the annual army bill, being rejected by 220 to 156.

Sir Laming Worthington-Evans, war secretary, declared that only 11 per cent. of the death sentences during the year were carried out, 89 per cent. being quashed or reduced. The death penalty, he declared, was intended less as punishment than as a deterrent to others.

Pioneer Doctor Dies

Winnipeg.—Dr. R. I. Mattice, 78, pioneer medical practitioner of Winnipeg, died March 31, following a four-day illness from pneumonia. He had been in general practice in Winnipeg for 22 years.

Is Champion Wheat Grower

Mr. J. Corbett Mitchell and his wife, of Dalnair, Sask., who returned to Canada on the Canadian Pacific liner "Montrose" recently. Mr. Mitchell, who holds the title of "World's Wheat Champion" and won this honor three years in succession, has been delivering a series of lectures throughout Great Britain on the advantages Canada offers for the settler.

Proposes To Settle Mosul Boundary Dispute

Turkey Offers Inducements to Britain

London.—The Daily Mail has reason to believe that Turkey has made a proposal for a settlement of her difficulties with Great Britain, mainly with reference to the Mosul boundary, separating Turkey from Mesopotamia. Turkey's suggestion, the Daily Mail says, is that she shall have the town of Mosul and that part of Mosul province immediately to the south. In return, she does not desire territory further south, which is predominately Arab, and she promises to guarantee indefinitely the frontier line to the south of Mosul.

The Mosul boundary dispute had its origin in the establishment of the Kingdom of Irak, formerly Mesopotamia, sponsored by Great Britain. The whole dispute revolved around two main points. Turkey wants Mosul for military reasons and Great Britain insists on having control of the territory, as British interests have large oil holdings there.

Charged With Bombing Plot

Infernal Machine Found in Possession Of Toronto Italians

Toronto.—Following the discovery of a powerful dynamite bomb, a sawed-off shotgun, a hand-digger filled with shells, several boxes of cartridges and spark plugs, police have taken into custody Rafael Emiglio, in whose house the stuff was found, and Faustino Manfredi.

Charges have been laid in connection with an affair on March 25, when a bomb exploded near the home of A. Bernardo, who previously had received a letter demanding \$1,500. Failure to pay would mean that his house would be blown up, the letter said. Bernardo, it is said, received another letter on March 25, stating "the explosion was a little one, and a big one will follow if the money is not paid."

Canadian Bakeries In Merger

Six Leading Companies Taken Over By New York Corporation

New York.—Six leading baking companies of Canada have been acquired by the Continental Baking Corporation of this city, it was announced through George G. Barber, chairman of the board of the local corporation.

The Northern Baking, Limited, has been incorporated in Canada, with headquarters in Montreal, and has taken over control of the Canadian companies which operate the bakeries in seven eastern cities.

Nova Scotia Financially Sound

Status Is One To Be Proud Of Says Premier

Halifax.—With the exception of Prince Edward Island and New Brunswick, the expenditures of Nova Scotia for the last fiscal year, \$5,577,872, were lower than those of any other province in Canada. Premier E. H. Armstrong declared in the legislature. The financial status of Nova Scotia, compared with other provinces, was one to be proud of and satisfied with, he said.

Russ-French Parleys

Paris.—Four Soviet experts have arrived in Paris for negotiations of an economic nature with the French Government. Leonid Krassin, the Soviet ambassador, has requested the government to set the time and the place for the first meeting.

Mary Idle In Vienna

Vienna.—Unemployment in Austria is greater than at any time since the war. Nearly 200,000 now are out of work.

Consider Refund Of Grain Futures Tax

Winnipeg.—Refunding of the \$30,000 collected as grain futures tax under the act ruled ultra vires of the province by the privy council and plans for meeting the resultant loss of revenue, are under consideration by the Bracken Government. Money collected under the act will be repaid, although the detailed process of making repayment has not been decided. A large proportion of the amount involved is held by brokers, who were awaiting the result of the prolonged litigation as to the validity of the legislation.

Geophone Used In English Mine Disaster

Instrument Indicated That None of Men Are Alive

Newcastle, England.—Military engineers brought to Chatham a geophone, an instrument constructed on the principle of the stethoscope, in the hope of being able to ascertain from sounds below if any of the 28 miners who were caught in the Montague Colliery by a rush of water several days ago, were alive. Nothing was heard through the instrument, and this was taken by the people of Scotland, where the mine is, as confirming their fears that all the men and boys below have perished.

Today was the first time the geophone, which was used during the World War, was applied to a mine disaster.

St. Paul's Cathedral Closed

Work of Repairing Edifice Will Take Six or Seven Years

London.—The people of London have had their last unobstructed view of the interior of St. Paul's Cathedral for probably six or seven years, and on March 31 the last service was held under the famous dome prior to closing the entire eastern part of the edifice for the work of strengthening it.

The whole area under the dome, together with the transept, choir and Jesus Chapel, will remain closed to the public until the cathedral has been made safe.

In the future services will be held in the western end of the nave and St. Dunstan's Chapel.

ANXIETY CAUSED BY ACTIVITIES IN JAP SHIPYARDS

London.—While Franco-German relations fill the public eye in European diplomacy, it is understood that British statesmen are far more concerned over the development in the Pacific than in Europe. The latter, they are confident, can be controlled, but the former is getting beyond control and the British leaders are now visualizing an early struggle for a white Pacific.

The committee of imperial conference have been devoting consideration to Pacific problems and reports from secret agents as well as diplomats give cause for grave anxiety. The reports indicate great secret activity in Japanese shipyards with the building of submarines and cruisers.

It is understood that America Chamberlain, the British foreign minister, told Frank B. Kellogg, the new United States secretary of state, before the latter left England, that Great Britain is now convinced that events are now shaping themselves dangerously in the Pacific, and he urged an early armistice conference in the hope of checking the Japanese preparations.

Naval interests are showing the keenest interest in the expressed cooperation of United States and British fleets in the Pacific and it is now an accepted fact that they will work together in the future.

Predicts Opening Of Navigation April 20

Ice Barrier at Head of Lakes Not Breaking Yet

Port Arthur, Ont.—The 18-mile stretch of solid ice which has lodged the harbors of Port Arthur and Fort William against navigation is beginning to show the effects of the spring sunshine, but it will be some time yet before there is any break in the ice barrier.

Captain Consins, veteran navigator of this part, does not think navigation will be open to the head of the lakes until April 30. Reports here indicate that the ice field extends as far as Isle Royal, though the thick ice does not go far beyond Thunder Cape.

WOULD RESTRICT JAPANESE FROM INVADING B. C.

Ottawa.—Restrictions in Canada similar to those in force in California to prevent Japanese invading agricultural lands in British Columbia, were asked in the house by A. W. Neil, independent, Comox-Alberni, who said that Japanese women and boys were coming into his province without restriction, and the "gentleman's agreement" concerning the influx of adult males was not being strictly enforced. Mr. Neil complained that Japanese were working in unfair competition with white men in the fisheries and canneries of British Columbia. They sent their women to work in the canneries with their backs' old babies strapped to their waists. The white men could not compete because they would not subject their women to such treatment. General restrictions to reduce the number of Japanese in Canada were urged by Mr. Neil.

Ship Buffalo Up North

2,000 Animals From Wainwright Herd To Be Transferred Soon

Edmonton.—With the building of two barges shortly at Waterways, first steps in the shipment of some 2,000 Wainwright buffalo to northern reserves will be under way.

The men who are to build the buffalo carriers are to have the barges ready by May 30, when it is expected that navigation will be open. Each barge will have capacity for four cars of buffalo, so it is expected that 200 animals will be handled on each trip to the new northern reserves.

Under the plans already made, the buffalo are to be taken to between 30 and 40 miles south of Fort Fitzgerald, where they will be turned loose to roam on an extensive reserve with their wild cousins, the wood bison.

May Again Discuss Peace River Railway

Possible Two Canadian Roads Will Have Another Conference

Ottawa.—There is a possibility of another conference of Canadian railway men being called to discuss a route for the Peace River Railway. On a question from D. M. Kennedy, Progressive, West Edmonton, in the house, Hon. G. P. Graham said that he would prefer not to give an opinion on the "probability" of an agreement being reached between the heads of the two Canadian railways on the subject until he had a report from them.

"If some suggestion does not come shortly," I added the minister of railways, "I think I will ask them to join in another conference to discuss the question again."

New Instruments To Forecast Earthquakes

Will Be Installed In Quebec By Federal Government

Ottawa.—Announcement that the Federal government intends to install new seismole instruments at Montserrat de la Parade, Que., for the determining in advance if earthquakes are likely to occur in the Saguenay River district, was made by E. A. Hodgson, seismologist of the Dominion Observatory, in addressing members of the Royal Astronomers of Canada.

Freight Advance Is Delayed

Increased Rate On Canned Goods Has Been Postponed

Washington.—Freight rates advanced on all canned goods, including condensed and evaporated milk, which railroads had proposed putting into effect April 1 between producing points in Minnesota, Michigan, Illinois and Wisconsin and Canadian and eastern consuming points, were held up by the interstate commerce commission until July 30. An investigation will be held meanwhile.

Rail Revenues Down

Ottawa.—Gross revenues on Canadian railways decreased by \$2,269,469, or 8.9 per cent., in January, a report from the bureau of statistics shows. Lighter freight loadings and a slight decrease in passenger traffic is reported by both railways.

The Canadian National had an operating deficit of \$326,982. The Canadian Pacific shows a decrease in the net operating revenues of \$171,296.

Air Hero In Plane Wreck

Nice, France.—Captain Pelletier-D'Osly, hero of last year's Paris-Tokyo flight, and two passengers, were rescued when D'Osly's plane fell into the sea. The plane was wrecked beyond repair.

Silver Cups For School Planting

Competition to Encourage Permanent Beautification of Grounds

The "ornamental planting of the grounds of the country schools is to be given encouragement in a competition arranged for by the Canadian horticultural council. A silver cup valued at \$25 is to be awarded in each province to the rural school that accomplishes the greatest degree of beautification of its grounds during the year. To enter the competition a photograph of the building and grounds and a letter of entry has to be submitted to the chairman of the provincial committee or to Mr. L. F. Barrows, secretary of the Canadian horticultural council at Ottawa. The provincial chairmen are as follows: British Columbia, Prof. F. E. Duck, University of British Columbia, Vancouver; Alberta, Prof. Geo. Harcourt, University of Alberta, Edmonton; Saskatchewan, Dr. F. C. Patterson, University of Saskatchewan, Saskatoon; Manitoba, Prof. F. W. Broderick, University of Manitoba, Winnipeg; Ontario, Prof. A. H. McLennan, Ontario Agricultural College, Guelph; Nova Scotia, Prof. Shaw, College of Agriculture, Truro; Prince Edward Island, J. A. Clark, Dominion Experimental Farm, Charlottetown.

One has only to observe the bare appearance of many of the school grounds in the country to realize the importance of this competition, which is intended to encourage permanent beautification that will increase in value from year to year. Schools will be encouraged to use such hardy and permanent planting stock, particularly flowering shrubbery, that will not suffer from lack of attention during the vacation period. The competing schools will first be judged by districts and the final award in each province will be made by the provincial committee of the council.

Siamese King Has Wonderful Motor Car

Contains Several Rooms Finished in Polished Mahogany

A motor car with a trailer, the whole valued at \$25,000, is to be presented to the King of Siam by the members of the Siamese royal household, according to word received in London.

There are several unusual features connected with the gift. The driver sits in the open, as in an ordinary car, but behind him is a compact little room set aside for his own use. There is also a dining room and sitting room, luxuriously furnished, and a bathroom. The trailer has a bedroom with one bed and a sitting room with two beds folding up against the wall when not in use. Both coaches are furnished throughout in polished mahogany. The weight of the car is nine tons and of the trailer seven tons, and the combination cannot exceed a speed of 34 miles an hour.

Alberta Railway Mileage

Province Now Has a Total of 4,382 Miles of Railways

Alberta now has a total railway mileage of 4,382 miles, compared with 1,660 in 1905, and 4,097 in 1915, according to the annual reports of the provincial railways department presented to the legislature. Of this mileage the C.P.R. operates 2,609 miles, the Canadian National 1,374 miles, the Edmonton, Dunvegan and British Columbia 423 miles, the Alberta and Great Waterways 282 miles, the Central Canada 48 miles, and the Lacombe and Northwestern 49 miles.

Changes in Bankruptcy Act

"The matter is engaging the attention of the government at present," H. E. Spence, Progressive, Red Deer, was informed in the House of Commons, when he asked it, and when the government would bring down legislation to give effect to some amendments to the Bankruptcy Act proposed by the banking and commerce committee of the house last session.

Construction in Canada

The total awards of Canadian construction for the month of February were \$11,017,000, compared with \$8,931,700 in January. The activity was distributed among the provinces as follows: Ontario, 21 per cent.; Quebec, 42.1 per cent.; British Columbia, 12.9 per cent.; prairie provinces, 5.9 per cent.; and the maritime provinces, 6.8 per cent. Contemplated new work in February aggregated \$23,771,800.

Fast Travelling

The British are building a seaplane to travel five miles a minute. Looks as if the time were coming when a man who breakfasts in New York can dine the same day in London.—Boston Transcript.

The Flower Garden

Bulbous and Fleehy Rooted Flowering Plants for the Prairie

According to the experience and experiments on the prairie experimental farms and stations, many varieties of flowering plants raised from roots, bulbs and tubers do well in the prairie provinces. At Scott, Saskatchewan, Mr. M. J. Timline, the superintendent, reports favorably on the dahlias, gladioli, iris and peony.

The dahlias were raised from seed started in hot beds in the early spring and transplanted to the gardens after the time of spring frosts. Some bloom was thus obtained late in the season when the roots were taken up with some soil adhering before the time of severe fall frosts. They were stored in shallow boxes in a frost-proof cellar. The roots handled this time were not rotten from time to time during the winter months. In April or May they were planted in the garden for their season's work.

Mr. Timline found satisfaction with several fine varieties, which he observes are obtainable from the nurseries.

At the Scott station the gladioli were planted in April. It is grown in rows as are vegetables and given frequent cultivation, and watering in dry times. The bulbs are taken up in the fall and stored in shallow boxes for the next season. The salmon pink variety, Halley, and a red sort known as Independence, are spoken of as having given fine bloom.

The iris has not done as well as some other plants at the Scott station where the climate is rather dry. Given more moisture it does well in the prairie provinces. Among the varieties recommended are Mrs. H. Darwin, Neglecta Sappho, Variegata Gracilis, and a dwarf form Chiameris.

Peonies in the west, as in other parts of Canada, should get in a thoroughly prepared soil, fertilized deeply, because the plants should not be disturbed for several years. September, Mr. Timline recommends as the best month for setting the plants. The soil should be well trenched and a good supply of well rotted manure mixed in throughout its whole depth. Three feet apart each way is regarded as a suitable distance for planting. The crowns should be set from two to three inches below the surface of the soil.—Canadian Horticultural Council.

Filling a Large Order

Interesting Details Regarding the Food Supplies of C.P.R. Passengers

A total of four million pounds of beef were served last year to Canadian Pacific patrons of the various services of the company. Flour used for other purposes than the making of bread, amounted to 5,600,000 lbs. Eleven million eggs, 6 million lbs. of potatoes, about 2 million pounds of poultry, approximately the same number of oranges and nearly 400,000 pounds of coffee, are some of the other items which figure in the bills of the commissariat. Fresh milk was sold to the extent of 1,500,000 quarts and 500,000 quarts of cream were also supplied. A large part of the food supplies is drawn from the company's own farm at Strathmore, Alberta.

Guard Health of Children

Leading British Dietary Expert Would Ban Candy

School children should get no cake, no puddings, no jam, no pastries, no sugar and no candy, says Dr. Henry Campbell, leading British dietary expert.

"The country would gain vastly," he said, "if all candy stores were converted into vegetable and fruit stores. Pudding and pastries of all descriptions should be barred absolutely. They provide no exercise for the teeth and jaws and merely pamper the appetite."

"Each boy should have three ounces of butter daily. Next to cod liver oil, butter contains the most fat."

Produced the Proof

A professor in a university met a former student of his, who looked bronzed and well.

"Hello!" exclaimed the professor. "You are the picture of health."

"Yes," said the younger man. "I am just back from my vacation. I gained nearly one hundred pounds."

"Nonsense!" cried the other. "I don't believe it."

"Don't you? Well, here it comes now" (as a young woman came in sight. "Wait a minute and I'll introduce you."

Trying Out New Fuel

Electric light and heat to cook meals in four new German liners will be provided by smelts. Waste gases from Diesel engines will go through a specially designed boiler. The heat will raise steam to drive dynamos which will supply current for light and heat.

A malaria-carrying mosquito does not fly nor a mile against the wind.

Ecclesiastical Junk Fills Historic Building

Westminster Abbey So Crowded Beautiful Things Cannot Be Seen

The proposal to overhaul Westminster Abbey so that more of its treasures and beauties may be revealed, has led C. W. B. Nevson, an English artist, to remark that the abbey is more like a departmental store than a church. The opinion that some of the most beautiful things in the abbey cannot be seen because of the overcrowded memorial statuary is shared by many lovers of the historic building, including Canon Westlake, the abbey historian.

"The proper course is to get rid of some of the ecclesiastical junk at present in the abbey," Mr. Nevson told the Westminster Gazette. "I think it could be cleaned out without offending anybody's susceptibilities. Ultimately many beautiful things could be discovered which cannot now be seen."

Denmark Escaped Winter Weather

Had No Snow and Frost Has Been Exceedingly Rare

This is the mildest winter Denmark has known in three centuries. Not once has the temperature fallen below the freezing point in the daytime, and the nights when this has been the case have been exceedingly rare. Generally the month of February is the coldest in Denmark; this year it has had the character of early spring. The mild winter has been blessed by everybody, except the furrers and the coal merchants. Particularly the latter are complaining bitterly. They are losing a great deal of money they say. Cities like Helsingore, Rosal and Rigen, which are usually buried in snow at this time of the year, have up to the present experienced nothing more wintry than a few nights of frost.

White Surfaced Roads Hard On Eyesight

Cause of Minor Eye Troubles Says English Optician

The grey or white surfaced roads of England, at which the increasing number of automobile drivers are compelled to gaze intently in guiding their speeding cars, are causing a mass of minor eye troubles, according to Arthur Upson in a recent address before the Institute of Opticians.

The grey or white surfaced roads of England, at which the increasing number of automobile drivers are compelled to gaze intently in guiding their speeding cars, are causing a mass of minor eye troubles, according to Arthur Upson in a recent address before the Institute of Opticians.

Blind After Seeing Eclipse

As a result of looking at the eclipse of the sun, Vera Miller, 18 years old, of Pittman, Pa., is totally blind today. The girl, disregarding warning to protect her eyes, but did not feel any ill effects until a week later, when she complained of not being able to see. Doctors assert that it is doubtful if she will ever recover her sight.—New York World.

Whistling Swans in Ontario

Eight whistling swans have arrived at the lake shore of Kingsville, Ont. Jack Miner is in hopes that they eventually will find their way to his sanctuary, where he would catch them, place his tag on their legs to study their migration, and in this way find their nesting grounds.

Sheep For Every Farm

Good Farm Practice Demands Attention to Sheep Industry

Resolutions advocating that the specially low duties granted Great Britain be discontinued, and that the research laboratory of the association, the only one of its kind in Canada, be continued, were adopted at the annual meeting of the Canadian Woolen and Knit Goods Manufacturers' Association at Toronto.

W. A. Dryden, a director of the Canadian Co-operative Wool Growers' Association, speaking at a luncheon, said every type of sheep, including Merinos, could be successfully raised in Canada.

"Sheep should be kept on every farm in Canada as part of good farm practice," he said. "They fit into mixed farming as do not other farm animals."

He said that, except for certain areas in the west, Canadian sheep should be kept for two purposes, wool and mutton, and that Eastern Canada was a small flock country.

The reason why there was not a flock of sheep on each Canadian farm was that farmers did not know enough about, or learn enough about, keeping them.

Birds Coming North Again

Thousands Arrive Daily at Miner Sanctuary in Kingsville

Population increases for this town and vicinity are figured in thousands every spring-like day.

It is an itinerant population, however, and includes, at the present time, some 10,000 migratory geese on the Jack Miner sanctuary, more than 1,000 swans on Lake Erie in front of the town, and 5,000 canvas back and red head ducks.

Many of these visitors bear tags indicating that they feed here on the way north or south in previous years. These birds are all protected by the Migratory Bird Treaty and Royal Canadian Mounted Police are here to see that the law is not violated, by the shooting or capturing of the migrants.

Schoolmates Keep Pledge

Have Written or Seen Each Other Every Year Since 1888

"So long as we each live, on the first day of March each year, we shall be together. And if it is impossible for us to be there, then the absent one must write letters to the rest."

This is the pledge made by four school girls and their teacher 59 years ago in the school yard of four towns, near Pontiac, Mich. This year three of the four attended the reunion and the fourth of the class sent a letter from California. The fifth to take the pledge, the teacher, died a few years ago.

Radio Plant For Calgary

Calgary will become the centre of an industry for the manufacture of radio receiving sets and supplies, as a result of the incorporation of the W. W. Grant Co. Ltd., with a capital of \$300,000. The new company will commence operations immediately and expects to be in full swing by July. An output of 10,000 sets per year is anticipated.

Airmen Have Reached Maximum Flying Speed

Also Height Limit Placed By Surgeons Is 45,000 Feet

Flight surgeons of the army air service believe that man has at last reached the maximum flying speed at which he can suitably change direction, owing to the centrifugal force exerted on the body and its effect on the blood. This speed is placed in the vicinity of 250 miles an hour. The limit, of speed on a straightaway course, they say, can probably be placed much higher than is now mechanically possible, but experience will have to write the actual figure. The height limit, they say, is around 45,000 feet.

Even when supplied with oxygen the flight surgeons hold, an aviator could not survive beyond a height of 45,000 feet, under ordinary circumstances, because the available oxygen pressure in the lungs would be too low to sustain life.

Between 23,000 and 25,000 feet is the "upper limit" of consciousness without oxygen, say the flight surgeons, and at higher altitudes oxygen is indispensable. Only if enclosed in a cabinet or suit in which the barometric pressure were kept at a degree compatible with life, would it be possible to ascend beyond the 45,000 limit, with suitable arrangement made for disposing of the surplus carbon dioxide.

Ship Searching For Bromine

Chemical Extracted From Sea Water Is Becoming Scarce

To extract bromine from the ocean will be the strange mission of the steamship Ethyl, under charter of the American Chemical Society. The Ethyl's voyage, the society claims, is made necessary by the world shortage of bromine, threatening to hit both industry and science. The ship will just roam about the sea, extracting the one pound of bromine which chemical experts claim is contained in every 1,700 gallons of sea water.

The success of the venture may mean the equipping of a fleet of bromine ships and the creation of floating chemical industries for recovery from the sea of other valuable constituents to enrich mankind, a member of the expedition said.

Saved Money, But Where Is It

Elmer Gray, assistant county attorney of Hennepin county, Minn., is a man of 70 years, but looks and acts like a man of 50. He attributes his "youth" to the fact that he has never eaten lunch in 35 years. During that time he estimates he saved \$3,250 or 35,000 meals, but would like to have someone tell him where the money is.

Pat and Mick found themselves in the audience of a concert at which one of the vocalists rendered "Bonnie Dundee."

"When the singer reached the words, 'Come fill up my cup, come fill up my cup,'" Pat turned to Mick and said: "Deferna. Ol' know Phillip McCann all right, but who the deuce is Phillip McCann?"

When you see a fellow weeping at a rich man's funeral you never know whether he is weeping because he's a relative or because he isn't.

Confidence In Canadian Eggs

Consumption of Eggs in Canada Is Rapidly Increasing

The three old millions of Canadian hens producing upwards of two hundred million dozens of eggs in a year will have to increase and work harder in future than they have in the past to meet the increasing demand for good eggs. The consumption of eggs in Canada has rapidly increased in recent years, due to the adoption of the grading system. Twenty-five years ago Canada's consumption of eggs per capita was about fifteen dozens in the year. Four years ago it had risen to twenty-one dozens and last year to twenty-six dozens eggs per head. This increase will surely continue as housewives become familiar with the standard grades, and the assurance that grading gives to those who do the purchasing for the family table. Nor will the increased demand for Canadian eggs, as their merits become known through systematic grading, be confined to Canada, because as has been shown before the agricultural committee of the House of Commons, Great Britain is learning of the excellence of Canadian eggs and taking more and more of them for their best trade. The United States, it was stated, is adopting the Canadian standard of classification which it is believed will have the same effect in that great republic as it has in Canada of increasing the annual consumption of some sixteen or seventeen dozens per capita to a higher consumption year by year. This, in the opinion of Mr. W. A. Brown, chief of the poultry division of the livestock committee of the House of Commons, will lead to a great demand for Canadian eggs in the United States.

No Expense Whatever

Keeping Fountain Pen Filled Did Not Worry Lauder

Among many recent books of sporting and artistic reminiscences none has more interesting personality than J. H. Lauder's "Old Pink 'Un Days," which, for the benefit of the uninitiated, should be explained as referring to the London Sporting Times. Here is a tale of Sir Harry Lauder:

"One wonderful day I lunched of enthusiastic Scots presented Harry and George 'Buddy' (of Dundee) and (Berkeley) with a story of Burns and a fountain pen apiece."

"Said 'Tadde' to Lauder: 'Harry, Ah'm thinkin' this fountain pen is goin' to cost a deal of money.'"

"'An' hoo dee ye mak' that out, George?' said Lauder to 'Tadde.'"

"'Hoot, noo!' and the great Harry laughed merrily—ye can always fill it up at the wee bit deskie at the post office, while ye pret' to write a telegram!"

Helpful and Valuable

Any Man Can Make Himself An Asset To His Employer

"That man is an asset to the road," said a commuter, speaking of a certain railway conductor. "I have never known him to give a passenger a cross word or to show the least sign of temper. More than that, he has a positive good nature about him that is contagious. He has been on the road a long time and knows many of the regular passengers by name as well as by sight, and he can take a joke as well as make one. I ride in on his train every morning and go to my work feeling better for having had a pleasant word or two with him." Such men help to create that value which appraisers of a business reckon as material, though they list it as good will.—Youth's Companion.

Alberta Grain Shipments

Bulk of Last Year's Crop Has Now Left The Province

Since the commencement of the grain shipping season on August 1st, 1924, to the end of February, 1925, the Canadian Pacific has handled 50,098,886 bushels of grain in Alberta. Of this 41,888,610 has been wheat and 8,098,276 bushels of barley. Practically all of this has been shipped out of the province as only 3,984,701 bushels of wheat and 1,446,566 bushels of other grain were placed in elevators up to the end of February.

Canadian Products For The Far East

Increased demand in the Far East for Canadian beef and butter was seen in the recent heavy consignment of refrigerated cargo which left Vancouver recently on the Canadian Pacific S.S. Empress of Russia. More than 250 tons of these commodities were shown on the ship's manifest.

Less than one-sixth of the potential horsepower of the United States has been developed.

At any rate our castles in the air need no c.

Lodge Meeting Where Masonry Was Instituted

Canadian members of the Masonic order among the passengers of the Canadian Pacific S.S. Empress of France, now on cruise of the world, while visiting Jerusalem had the unique experience of a meeting in the place where Masonry was instituted by King Solomon in 975 B.C. This in the quarters of King Solomon, which are tunnelled 700 feet under Jerusalem, the opening being near the Damascus gate just beneath the wall of the city. A pure white stone is still being quarried from the vast caverns and gables made from this stone and bearing the Masonic emblem were carried away by members of the France Masonic Club.

WORLD HAPPENINGS
BRIEFLY TOLD

Between May, 1922, and January 31, 1925, ships of the Canadian Government Merchant Marine carried 9,948 head of cattle from Canada to United Kingdom ports.

Lieut.-Governor W. C. Nichol, of British Columbia, who returned recently to Canada after a journey through France, reported that Anglo-French relations were never better.

The Federal Government has collected \$907,926 in all for royalties on coal mines in Alberta during the last five years. There is an amount of \$3,829 outstanding.

First Lieut. Clifford Eilman, of Russellville, Ind., was killed and Sgt. Erwin Meserich severely injured when their aeroplane fell 150 feet at Honolulu.

Hon. G. P. Graham, minister of railways and canals, received many congratulations and bouquets of flowers March 31, in remembrance of his sixty-third birthday.

"The Dominion Patriot," a four-page bi-weekly newspaper, has made its appearance in Toronto, featuring news matter of interest to the Ku Klux Klan of Canada.

The first Soviet trawler to visit England arrived at Grimsby with a catch of fish from the White Sea that was immediately condemned as unfit for food. Hitherto the Soviet Government has exported nothing to England but bad eggs.

The government has been advised of the payment by the British Government to the Canadian high commissioner in London of Canada's first installment under the Dawes' reparation plan. The amount is approximately £135,000.

According to a dispatch from London, Fridtjof Nansen has consented to head a scientific expedition to the North Polar regions on a Zeppelin of 150,000 cubic feet capacity, commanded by Captain Drans, German Zeppelin commander, for the purpose of exploring and mapping the Arctic.

The Turkish Government has addressed a note to the powers, asserting that it cannot agree to the continuance of foreign embassies in Constantinople. It demands the transfer of the embassies to Angora, in Asiatic Turkey, the present seat of the government.

King-George's yacht, the Britannia, is one of the fastest afloat. It carries 9,235 square feet of canvas when in full sail.

In Girlhood and Womanhood

"My first experience with Dr. Pierce's Favorite Prescription was about the time I was growing into womanhood," said Mrs. Hilda Hodgins of 301 Aylmer Ave., Windsor, Ont., whose picture appears above. "I had become run-down, my nerves were bad and I got very weak and trembly. My mother gave me Dr. Pierce's Favorite Prescription and it completely built me up in health, strengthened my nerves and made me feel well and strong. Since I married, whenever I have felt myself going down in health, or my nerves beginning to bother me, I have taken the Favorite Prescription and every time it has done for me just what I expected it would do—built me up in health and strength, quieted my nerves and made me feel fine. There isn't any medicine a woman can take for her ills that can compare with 'Favorite Prescription.'"

Send 10c to Dr. Pierce's Laboratory in Bridgeburg, Ont., for a trial pkg. Favorite Prescription tablets.

W. N. U. 1571

Manitoba Liquor Problem

Heavy Expense of Law Enforcement Referred to in House
That the liquor law enforcement was costing the Manitoba Government more under existing laws than under the Manitoba Temperance Act of prohibition days was the statement made by the attorney-general, R. W. Craig, in the legislature in rebutting the opposition attacks on his proposal to deduct part of the costs of enforcement from the share of liquor profits allocated to the municipalities. The fact that two acts the Liquor and Temperance Acts, now had to be administered, increased the difficulties which the province was called upon to face in dealing with the present liquor problem, he stated, as well as increasing the expenditure.

Agony Of Lumbago
Quickly Soothed Away
By "Nerviline"

For the sharp, piercing pain of Lumbago, and the tormenting aches of Rheumatism, no liniment is so efficient, so quick to bring comfort and relief as good old "Nerviline." This wonderful liniment penetrates through the tissues very quickly, sinks at once to the core of the pain, draws the blood from the congested area, and thereby relieves the pain in a short time. Those who suffer from stiff joints, swellings and Rheumatic conditions should use Nerviline, the King Pain Destroyer. Get Nerviline today, 35c, at all dealers.

Alberta Registered Seed

\$2,000 Bushels of Registered Seed Grain Handed This Season
The Alberta Government seed cleaning and grading plant operated by the provincial department of agriculture and the Alberta Seed Growers' Association, has handled to date for the present season a total of over \$2,000 bushels of registered seed grain. Shipments have been made to farmers in the province of Saskatchewan, Manitoba and some on the Northwestern States.

HER NERVES SO BAD
SHE COULD NOT SLEEP

Mrs. Grace Kitchen, St. George, Ont., writes: "After having a severe attack of pneumonia I was left in a weak and run-down condition. My nerves were so bad I could not sleep nights, and in the day time I had terrible fainting spells, caused by my heart being weak. Finally I got so bad I had to take to my bed for weeks at a time, but one day I read about

MILBURN'S
HEART AND NERVE PILLS

so decided to try them.
After taking one box I felt a slight improvement. I have now taken five boxes, and have gained 35 pounds in weight. I am now more than able to do all my own housework as well as considerable outdoor work. I cannot recommend Milburn's H. & N. Pills too highly for those suffering as I did."

Supporting the Northern Route
A National Undertaking That Must Be Completed

The Western Canadian attitude towards the Hudson Bay project ought to be one of steady, unflinching support for the policy that this is a national undertaking which the Dominion Government must consider in connection with other national undertakings, giving it a place according to its history, the extent of the public interest which is behind it and its importance.

This is no scheme thought out yesterday for the purpose of inducing the spending of public money. A generation of Western Canadians have seen the vision of a route to the markets of the world through the northern seas; and, in the face of passive indifference and active hostility, the seed succeeded, nearly 20 years ago, in convincing the Parliament of Canada that this was an enterprise to which the Dominion could properly commit itself—Manitoba Free Press.

Nothing To It

Mrs. Suburb—Your husband always dresses so quietly.
Mrs. Next-Door—Oh, does he? You ought to hear him when he loses his collar suit!

Alberta Alfalfa Seed

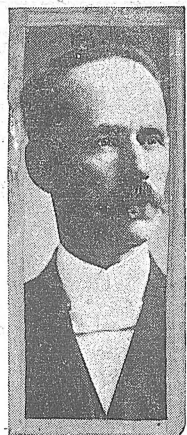

Two hundred and sixty thousand pounds of alfalfa seed, a comparative new product, has been sold from the 1924 crop of Alberta.

Holloway's Corn Remover takes the corn out by the roots. Try it and prove it.

For one murder in London there are four in New York, and no fewer than eight in Chicago.

Minard's Liniment Fine for the Hair

Was Prominent Social Worker

DR. J. G. SHEARER
General Secretary of the Social Service Council, who died very suddenly in Toronto.

Death Of Dr. Shearer

Was General Secretary of Social Service Council of Canada
Toronto—Rev. Dr. J. G. Shearer, general secretary of the Social Service Council of Canada, died suddenly here March 27.
Rev. Dr. Shearer was born at Brighton, Ontario, in 1859. He was a graduate of the University of Toronto and was one of the founders of the Lord's Day Alliance of Canada. Since 1907 he had been general secretary of the Social Service Council of Canada and had done effective work with this organization. He was well known throughout Canada and enjoyed wide respect.

To Hunt Rare Beasts

Kermitt Roosevelt to Visit Central Asia
In Search of Museum Specimens
Animals to be sought for the Field Museum by Colonel Theodore and Kermitt Roosevelt and George K. Cherrie during the James Simpson-Lord expedition to Central Asia this year are among the strangest and most beautiful in the world, according to zoologists at the Chicago museum.

The expedition, announced by James Simpson, president of Marshall, Field & Co., will sail from New York. It probably will enter India via Bombay and travel northward by rail to the foot of the Himalayan outer range and go by automobile to Srinagar. From there on into the Pamir region, elephants it will use pack horses, yaks, camels and coolies.

In addition to seeking specimens of the rare Ovis Poli, or Marco Polo sheep, the three white men will also hunt the Markhor, the finest of goats; the Yarkand stag, the Himalayan ibex, the spotted gazelle, the long-haired tiger, the once or once leopard, the Tibetan Argali, a wild sheep, the Tibetan antelope, the Kashmir stag, the big Asiatic brown bear, and other mammals, as well as birds of the region, according to D. C. Davies, director of the museum.

A Household Medicine.—They that are acquainted with the sterling properties of Dr. Thomas' Electric Oil in the treatment of many ailments would not be without it in the house. It is truly a household medicine and it is effective in dealing with many ordinary complaints it is an inexpensive medicine. So keep it at hand, as the call for it may come most unexpectedly.

Value of Farm Lands

According to a bulletin issued by the Dominion bureau of statistics, the average value of occupied farm lands in Alberta is placed at \$25 an acre, in comparison with \$24 for 1923. The highest average is British Columbia with \$95 an acre. Alberta has the lowest average price per acre of occupied farm lands in all the provinces of Canada, save Saskatchewan, where the average value is estimated at \$24 an acre. Manitoba's average is \$28 an acre.

Very Bothering

Thomson.—What's the matter? Finance bothering you?
Johnston.—Yes! I owe Rogers five pounds, and today I've got it, and he knows I've got it, and he knows I know he knows I've got it.

Calgary's Mill Rate

Calgary's mill rate will be 42 mills this year, which is two mills lower than in 1924 and less than the tentative estimates for 1925.

The word "allitumum" has caused some wars; the word "forelgers" causes most of them.

Broadcasting From
Air Is Successful

Messages Sent 5,000 Miles From U.S. Army Air Field
Excellent results are being achieved with a radio set weighing 50 pounds and having a sending range of 5,000 miles, U.S. marine flying corps officials state. Developed primarily for use on aircraft, where light weight is a vital factor, the "weatherweight" radio has successfully broadcast messages to the Island of Guam, a distance of nearly 5,000 miles from the army air field, where the radio has been installed.

SPRING IMPURITIES
DUE TO POOR BLOOD

A Tonic Medicine a Necessity at This Season

Dr. Williams' Pink Pills are an all-year-round tonic for the blood and nerves. But they are especially valuable in the spring when the system is loaded with impurities as a result of the indoor life of the winter months. There is no other season when the blood is so much in need of purification and enrichment, and every dose of these pills helps to enrich the blood. In the spring one feels weak and tired. Dr. Williams' Pink Pills give strength. In the spring the appetite is often poor. Dr. Williams' Pink Pills build the appetite, tone the stomach and aid weak digestion. It is in the spring that poisons in the blood find an outlet in disfiguring pimples, eruptions and boils. Dr. Williams' Pink Pills clear the skin because they get to the root of the trouble in the blood. In the spring, rheumatism, indigestion, neuralgia and many other troubles are most persistent because of poor, weak blood, and it is at this time when all nature takes on new life that the blood most seriously needs attention. Some people do these things and hold out for a while, but they further weaken themselves. A purgative merely gallops through the blood and holds it for a while, but does not help the blood. On the other hand, Dr. Williams' Pink Pills enrich the blood which reaches every organ in the body. It gives new strength and vigor to weak, easily tired men, women and children. Try Dr. Williams' Pink Pills this spring—they will not disappoint you.

Among those who have proved the value of Dr. Williams' Pink Pills is Mr. Austin Wile, Hamford, N.S., who says: "I have reason to be deeply grateful for what Dr. Williams' Pink Pills have done for me. An abscess developed in my head, and the doctor who was called in said my whole system was poisoned. My appetite completely failed and I grew so weak I was unable to do any work. The doctor's medicine did not help me so I decided to try Dr. Williams' Pink Pills. At this stage I was reduced almost to a skeleton, and my friends did not look for my recovery. I saw, however, that the pills were helping me and after taking them for about two months I was fully restored to health. My case was known to all my neighbors and my recovery looked upon as almost a miracle. You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Cheap Flight For French Aviator

Airplane travel at a cent a mile is the latest accomplishment of the French aviator, because of the sale of the price of 50,000 francs for the cheapest flight from Paris to Rome. Drouin covered the distance at an expenditure of 15 francs, or about 30 cents for 30 miles.

The wag of a yellow dog's tail is better than the shake of a false friend's hand.

CUTICURA HEALS
SKIN TROUBLE

Eruptions On Shoulders, Neck and Face, Itched and Burned.

"My trouble began with red spots breaking out on my shoulders, neck and face. They itched and burned causing me to scratch and irritate the affected parts. The eruptions scaled over and my clothing aggravated them. My face was disfigured and the trouble kept getting worse.

I began using Cuticura Soap and Ointment and after using three cakes of Cuticura Soap and one and a half boxes of Cuticura Ointment I was completely healed." (Signed) Miss Pauline Mills, R. F. D. 4, Quaker City, Ohio, June 15, 1923.

Cuticura Soap, Ointment and Talcum are all you need for every-day toilet and nursery purposes.
Beware! Each Tube by Mail, Address: Canadian Agents, The J. C. F. Co., 25 St. John St., Montreal, P. Q. Get your new Shaving Stick.

SUNDAY SCHOOL LESSON

APRIL 12
THE CRIPPLE AT THE BEAUTIFUL GATE

Golden Text: I am Jehovah that healeth thee. Exodus 15:26.
Lesson: Acts 3.
Devotional Reading: Isaiah 35:3-10.

The Text Explained and Illumined
The Request of the Cripple, verses 1-7. In the days which we are studying there were no clocks like ours to measure time. Whether the Jews used sundials, or water clocks, or some other contrivance, we do not know. They divided the day between sunrise and sunset into twelve equal parts, and of course the length of each part, or hour, varied, being long or short in summer than in winter.

Nine forty years ago and three in the afternoon were the two hours fixed by law for sacrifice and prayers, Acts 3:1. It was three o'clock in the afternoon, the ninth hour, as Peter and John were about to enter the temple enclosure for prayer, that they came upon a cripple sitting on the steps begging. Visitors to Palestine will have no difficulty in visualizing this scene. The lame and the blind, the poor and the diseased, are sitting around every church door seeking alms. The blind are led and the lame are sometimes literally carried on the shoulders of obliging friends to their accustomed place. Whether the beggars are impostors or not, few pass them by without giving them a copper piece of the value of half a cent. On Friday afternoons the steps leading down to the Jews' Walling Place at Jerusalem are so occupied by beggars of all sorts and descriptions that one makes his way through them with difficulty.

This beggar whom Peter saw was about forty years of age (Acts 4:22), and had been a cripple from birth. He was carried daily to the Beautiful Gate to beg, that gate of the temple through which no cripple nor deformed person might pass into the temple area.

Interested In Northern Air Route

Idea Revived On Account Of Improvement In Airship Construction
Germany, the Scandinavian countries and Japan, all are showing interest in a proposal to operate an air route over the North Pole area from the coast of Russia to Alaska. The idea is not particularly new, but it has been revived recently because of the improvements, of late years, in airship construction. It is understood that Dr. Fridtjof Nansen has offered to lead such an enterprise under international control.

An airship a little larger than the Los Angeles is contemplated for the run. May is regarded as the best month in which to start. Murmansk, on the north coast of Russia, would be the European point of departure. The route would be over Emperor Francis Joseph Land, the Polo and then over the unknown territory of North Canada to Alaska. The return trip would be over Behring Strait, Wrangel Island, DeLong Island, and the unexplored territory of Nova Zembla.

The Japanese are especially interested because success might result in quicker communication between Europe and Japan.

Infallible New War Weapon

Airplane Cannot Escape Bomb Launched From Ground Is Report
The London Westminster Gazette reports that secret experiments are in progress with one of the strongest anti-aircraft weapons ever devised. Experts believe it may prove potent in aerial warfare than torpedoes and submarines in naval fighting, the newspaper says. It consists of a bomb, which, when within a certain radius of an airplane, responds to the pressure waves sent out by the motor of the airplane, which induces give the bomb immensely increased velocity toward the plane.

No amount of manoeuvring by the pilot, according to the description of the newspaper, will enable him to escape and the plane is doomed. "The bomb is launched from the ground, and it need not be fired, will eliminate the need of anti-aircraft guns."

Dog Has Clock In Collar

Women have put clocks and watches on wrists, ankles and garters, but Mrs. Arthur Perriam, of San Diego, California, went even further when she put a large clock on her dog and installed a small carriage clock in the collar. Mrs. Perriam's limping retriever is an object of amazement to pop-eyed Britainers when she and the pup take their stroll on the Strand.

Peace of Pacific Essential

Premier Bruce, of Australia, believes that in the peace of the Pacific there lies the best guarantee of the future of the world, and that by friendship between Australia and the United States much can be done for the peace of the Pacific.

Murders In Berlin Increase

Movement to Restore Capital Punishment At German Capital

There have been no executions in Berlin since 1921, and it is now being alleged that the number of brutal murders has increased in the German capital because of the disposition of the courts to impose sentences of life imprisonment instead of death. Berlin has no executioner and the discussions in the papers as to the advisability of restoring capital punishment have brought more than 100 applications from men who want to serve as hangman.

Not A Symptom
Left Anywhere

Dodd's Kidney Pills Cleared Up Joseph Lessard's Kidney Trouble

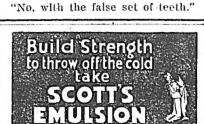

Quebec Man Tells How and Why He Is Now Enjoying All His Old-Time Health and Vigor
St. Leon, Que.—(Special).—"It gives me pleasure to tell you how satisfactory your Dodd's Kidney Pills have been to me." Mr. Lessard states in an interview. "I have had boils for the past eight months and have spent over \$60 for treatments, which did not relieve me of them. After taking five boxes of Dodd's Kidney Pills my boils have disappeared. I also had violent pains in my kidneys and they have also gone with the boils. I am now feeling fine and am quite well. I would like to recommend Dodd's Kidney Pills to all persons who suffer with similar complaints in my own case. Dodd's Kidney Pills stimulate and strengthen weak kidneys. You will be surprised how quickly they begin to cleanse and purify to soothe and heal the kidneys, at the same time backaches, rheumatism and other disorders caused by impure blood disappear."

Mrs. Sadie Keim of 169 Christie Street, New York, is the only woman horse clipper in the United States. She can clip a horse in four minutes, which she claims is a record.

Externally or Internally, it is Good. When applied externally by brisk rubbing, Dr. Thomas' Electric Oil opens the pores and penetrates the tissue, touching the seat of the trouble and immediately affording relief. Administered internally, it will soothe the irritation in the throat which induces coughing and will relieve affections of the bronchial tubes and respiratory organs. Try it and be convinced.

New Wheat Pool Boundaries

By J. P. Watson, Chinook.
Re-organization of the Wheat Pool Districts has now been completed. Each of the seven Districts has been subdivided into subdivisions, based on acreage therein, and each subdivision will elect its own delegate, who will be the representative of said subdivision.

North Calgary, in which we in Chinook are placed, is smaller now in area than formerly. Chinook (village) is inside subdivision No. 5. This division consists of all Sounding Creek M.D., No. 27, and six townships (or two thirds) of M.D. No. 303 which lies north of Sounding Creek M.D.

The R.M.D. of Coliholme, No. 243, together with the three western townships of Cereal M. D. No. 242 comprise subdivision No. 4, of the North Calgary District.

This simplifies things considerably. Each member resident in these two subdivisions, will

know what he is doing in the selection of a delegate during May when the lists will be out.

Those of us who participated in the endeavour to have the districts subdivided feel it our duty to urge members to make full use of this reorganization. Responsible representation is now obtainable, and it is hoped the members will take an active and intelligent interest in the Pool's affairs, so that mistakes of the past will not be repeated.

From all traditions, the egg has been associated with Easter from the beginning of its celebration. It is supposed to typify the revival of life out of death, or, in other words, the resurrection. Another beautiful suggestion of this idea is developed in the butterfly, and it would seem that nothing could be more appropriate for an Easter decoration than these lovely winged creatures whose mission in life, like that of a rare and gifted soul, of which it was anciently regarded as the emblem, seems only to diffuse joy and radiance and beauty wherever they go. Formerly the eggs were blessed by the priests and distributed among the parishioners.

M. D. of Coliholme

A meeting of the Council of the M. D. of Coliholme was held last Saturday in the Coliholme School. All members were present.

The Secretary was instructed to advise Mr. F. J. Scott, Solicitor, Calgary, that the Municipality accepts no responsibility in connection with R. M. Cook's account against Jos. Whatley for medical services, at the same time explaining why this stand is taken.

That W. D. Walter be a committee of one to confer with the Councillor from Sounding Creek M.D. concerning the condition of the road between Townships 28 and 29 Range 8, with a view to coming to some mutual agreement between the two Municipalities whereby this road be made passable.

The Reeve and Secretary were authorized to sign all cheques, notes and other negotiable securities for and on behalf of the Municipality in connection with the Municipal accounts carried with the Union Bank of Canada, Chinook and the Canadian Bank of Commerce, Youngstown.

The Secretary was authorized to endorse all cheques, notes and other negotiable securities for the municipality for deposit to the credit of the Municipal District only.

W. W. Wilson was appointed Auditor for 1925 at a salary of \$100.

The representative from this Municipality on the Clemens Rural Credit Society Board be paid \$3 per meeting and to cents per mile necessarily travelled.

The Municipal Mill Rate was set for the current year at four mills based on the following Receipts and Expenditures:

RECEIPTS—	
Cash on hand	\$ 5,000
Current Tax	10,500
Accounts	1,000
	\$16,500
EXPENDITURES—	
Salaries, Sec.—Treas	\$1,800.00
" Auditor	100.00
" Councillor's Fees	500.00
Office Expense	500.00
Secretary's Bond	12.50
Delegates Expenses	125.00
Election Expenses	75.00
Rental	24.00
Indigent Relief	2,000.00
Hospital Accounts	2,000.00
Mother's Allowance	90.00
Tax Refunds	100.00
Tax Sale Costs	300.00
Grants and Cemetery	150.00
Public Work	Nil
Sundry	223.50
	\$8,000.00

A number of bills were passed and ordered to be paid.

The Council will meet again on Saturday, May 16.

Chinook Village Council

The regular monthly meeting of the Chinook Village Council was held last Tuesday evening in the Secretary's office. All the Councillors were present.

It was decided that the Council meet the first Monday of each month instead of first Tuesday.

That a 10 per cent. discount will be given on all current taxes except Supplementary, paid on or before the 1st day of July, 1925.

The following accounts were ordered to be paid:

C. E. Barry	\$ 2 50

R. Payton	1.00
W. Vennard	14 75
A. McAlister	25.00

LOCAL ITEMS

Don't forget the Parcel Post Sale and Ladies' Aid tea in Mr. J. Rennie's office, Saturday, April 11, from 3 to 6 p.m.

Leslie Milligan left Tuesday for the Cereal district where he will work for Mr. Sam Machell.

G. M. Thomas shipped a fine young bull on Thursday from Chinook for the Stock Show in Calgary.

Mrs. A. Speight of Drumheller, is visiting at the home of her mother, Mrs. J. K. Yeats.

Clifford and Vernon Aarsby arrived in Youngstown Saturday from Carstairs driving out Sunday to their father's farm north of town.

There was a fair sized audience attended the entertainment put on by The DeBuhl Concert Company last Friday night in the School. While the vocal selections were rather weak, the musical items were good and consisted of classical and jazz to suit all tastes. The pianist was the star of the evening whose ability on the ivories was splendid. The concluding number was a sketch which was well acted and created considerable fun. A dance followed the program.

Mr. and Mrs. Leroy Arms left today for Detroit, Mich., where they will reside.

The usual fortnightly meeting of the School Literary Society was held on Friday afternoon. The following program was presented: Recitation, Douglas Smith; piano solo, Caro Dumanowski; sketch, "Parliamentary Law" by Leslie Clipsham, Roland Massey, Harold Stewart, Ethel Young, Audrey Neff, Caro Dumanowski and May Todd; song, Crystal Aarsby.

Death By Drowning

Mrs. R. Vanhook received the sad news on Tuesday of the death by drowning of the three-year-old daughter of her brother, Mr. L. W. Berry, of Gerber, California. From the information at hand it appears that the little girl wandered down to the creek near her home and fell in and was drowned before assistance could be obtained.

Mr. and Mrs. Berry are well known in this district, having farmed for a number of years in the Clemens district.

Municipal Hail Insurance

Approximately 57 per cent. of the hail insurance written in the province during the past six years was carried under the municipal plan, according to a statement made at the annual meeting of the municipal hail insurance board.

Provincial Savings Certificates

The first quarter of 1925 has brought a total of \$1,948,239 into the provincial treasury through the purchase of savings certificates. This is one of the largest total buyings for a similar period since the savings certificate plan was instituted. To date, there are 4702 investors in these savings certificates, of which 4373 are Alberta investors. From United States they are 92 investors in these certificates while British Columbia has provided 106.

Canadian Big Game For Austrian Alps

Here are seen some fine specimens of mountain sheep, photographed near Banff, Alberta. Inset, a mountain goat living on the side of the fine granite cliffs. These big game animals provide.

At Banff railway station recently a small official gathering bade goodbye to six worthy members of Nature's Own Alpine Club. They had never before been passengers although from their lofty home in the Canadian Pacific Rockies they had watched and heard the trains that day by day shuttle smoothly to and fro on the world's greatest highway. In deed so close to the railway track did they often venture that the people in passing trains had the unique pleasure of seeing these hardy mountaineers ascending and descending the cliffs and crags of their native haunts.

For they were the famous "Big Horns," the wild sheep of Canada's great mountain region. Lodged in upholstered crates, accommodated in a roomy Dominion Express car, they were consigned to a large estate high up in the Alps of Austria where they will have liberty to roam in a congenial environment and where, it is hoped, they may in course of time multiply and become as abundant as the flocks that feed on the Alpine meadows near Lake Louise and that wander upon the sunny slopes of Yoho Valley.

Count Hobenstein, an Austrian nobleman, who had travelled in the Rockies and who had seen the wild sheep of that region, believed that given opportunity they would easily

become acclimatized and would thrive well in the highlands of his native country. Anxious to put his theory to the test he entered into negotiations with the Canadian Government and succeeded in securing two rams and four ewes for export to Austria.

In the Canadian Pacific Rockies where "Big Horn" sheep are increasing enormously in numbers there is yet a great plenty of other large game animals. The territory westward of and convenient to Lake Windermere Camp is noted for Grizzly Bears. A comparatively short trail journey northward from Lake Louise brings one into a region where white goats clamber on the cliffs and crags. In the open valleys south of Banff there are many elk and moose abounding. Too, out there the Spray Lakes sparkle in the sunshine, the finest trout water in Nor' West Canada. And whether you hunt with rifle or with camera the sportsman will find trophies worth the winning in this vast, and unspoiled land of sportsman's lure.
